List of contents

- Reason for extension / correction : See details in page 3
- Used test equipment : See details in page 3 and 4
- Component specification : See details in page 5 to 6
- Test requirements : See details in page 7 to end of the document

Conformity statement

Tests were carried out in consideration of worst case selection principle and cover all the type / versions mentioned above in the test report.

Worst case selection principle

Variant with more installations methods should be chosen as the worst case

Remarks

G308A is with top-tether and the parts for the integral class which are the main differences from G308B, G308A is selected for all the tests to cover G308B.

Test was carried out with the component on the same way as the manufacture declared in information document.
